- English – (Currently Studying)

EDUCATION

- High school completed

PROFILE

Dependable and safety-focused Construction Laborer with over six years of hands-on experience supporting residential and commercial construction projects. Skilled in site preparation, demolition, excavation, concrete work, masonry support, framing assistance, drywall installation and material handling. Experienced operating hand and power tools, maintaining organized job sites and working efficiently in physically demanding outdoor environments. Recognized for a strong work ethic, reliability and the ability to quickly adapt to new tasks while helping crews maintain productivity, meet project deadlines and deliver quality workmanship.

WORK EXPERIENCE

CONSTRUCTION LABORER

Various Residential & Commercial Construction Projects | Porto Velho, Rondônia, Brazil

January 2020 - Present

Performed physically demanding construction work on residential and commercial projects, supporting crews through every stage of the construction process. Prepared job sites, transported and staged construction materials, organized tools and equipment, and maintained clean, safe and efficient work areas to keep projects moving without delays.

Assisted with excavation, trenching, demolition, concrete mixing, pouring and finishing, masonry, block laying, drywall installation, framing support, painting preparation and basic carpentry. Operated hand and power tools safely, assembled temporary structures, mixed concrete and mortar, and assisted skilled trades with daily construction activities while maintaining quality standards.

Regularly lifted and carried heavy construction materials, including cement bags, concrete blocks, lumber, steel components and equipment throughout the workday. Worked outdoors in high temperatures, rain and physically demanding conditions while maintaining productivity during long shifts and adapting quickly to changing job site priorities.

Recognized for reliability, strong work ethic and willingness to perform a wide range of construction tasks. Worked closely with supervisors and crew members to complete projects on schedule and maintain safe, organized and productive job sites.

TOPOGRAPHY ASSISTANT

Projet - Piracicaba, São Paulo, Brazil

October 2023 - January 2025

Supported engineers and survey crews on active construction and infrastructure projects by performing field measurements, site layout and equipment setup. Operated GPS RTK, Total Station and electronic data collectors to assist with accurate surveying, boundary marking and construction staking before and during project execution.

Transported and assembled surveying equipment across rough terrain, prepared work areas and assisted with drone mapping operations while working safely around heavy equipment and active construction sites. Maintained measurement accuracy, organized field data and helped crews complete surveying activities efficiently to support project schedules.

Worked outdoors for extended periods under varying weather conditions, walking long distances over uneven terrain while carrying equipment and assisting construction teams with layout verification and field operations. Demonstrated attention to detail, teamwork and reliability while supporting engineering and construction projects.
