ARTHUR HENRIQUE RODRIGUES SOUZA

Profile

Brazilian, 33 years old, physically bem and reliable, looking for a seasonal H-2A opportunity. I grew up around horses and farm life in rural Brazil riding, feeding, cleaning stalls and combined that with tough, modern field work: agricultural drone operations, solar panel installation, and heavy warehouse labor. Comfortable lifting 50+ lbs all day and working long hours outdoors in any weather. New to formal cattle/horse training, but a fast learner ready to prove it.

Professional Experience

Agricultural Drone Pilot Assistant - SOAR - Aerial Solutions
Sep 2023 - Jan 2024

Traveled to different farms supporting crop-spraying operation by drone. Prepared and loaded the spray solution into the tank following safety procedures, and worked outdoors under strong sun, rain, and at night, with no fixed schedule proof I can handle unpredictable hours and tough field conditions.

Stock Clerk - Vital Supermarket
Jul 2022 - Aug 2023

Worked a full year on my feet for many hours, walking constantly through store aisles, organizing stock, checking expiration dates, and carrying heavy boxes and balloons (55lb+) every single day. Built real physical endurance and discipline following supervisor instructions.

Solar Module Installation - Ápice Engenharia
Dec 2021 - Apr 2022

Installed solar panel structures in the field, working on ladders under strong sun for many hours. Panels weigh between 25 and 32 kg and measure about 2.20m x 1.13m heavy, awkward loads that built serious strength and balance.

Personal / Unpaid - Hands-On Horse & Rural Experience

Not a paid job, but years of real, daily experience with horses growing up in rural Brazil: feeding, cleaning stalls, riding since childhood, and recognizing signs of discomfort or illness in an animal. Comfortable and confident around horses, including young or high-energy ones.
